

CCI Thermal Technologies

To expand their component manufacturing operation for the power generation industry, CCI Thermal Technologies bought an existing 90,000 sf facility in Oakville. Trumbley & Hampton is renovating the building including building new 20,000 sf two storey offices. Plant work includes new foundations for a heavier crane, a rail system for a gantry crane, concrete block demising walls, pit enclosures and new plant control offices with washrooms.
