

Endress + Hauser

Burlington, Ontario, Canada

Description

Trumbley & Hampton designed and built the prestigious Canadian Head Office for this world leading supplier of non-intrusive metering devices in Burlington, Ontario. The facility features an 18 foot high clerestory open office area, a circular glazed Boardroom and a white precast concrete accent wall to blend the building components with the angles of the corner street intersection.

To handle Endress + Hauser's increasing business, Trumbley & Hampton returned three years later to design and build a two storey office addition with an elevator to compliment the original building.

End Use

Head Office and Warehouse
