

## GE Canada Laboratory

Over the past 5 years, Trumbley & Hampton has completed several projects for GE Canada in Burlington and Stoney Creek including expansion of the production crane bay areas, addition of a research laboratory, addition of a two storey office and electronics assembly facility, along with extensive renovations to the original 1970's office area.

The project above is a research laboratory that was created by partitioning off an area of a transformer repair facility and fitting it out with laboratory lighting, HVAC and fixturing.
