

This project involves the renovation of an active 40 year old Recycling Centre in Niagara Falls to provide energy and utility savings as well as providing improved working conditions for the staff. Sustainability improvements and increasing efficiency of resource usage are the key goals.

New features of the project include:

- enclosing of the sorting areas
- heating and air-conditioning
- natural ventilation
- upgraded finishes

- energy efficient lighting
- geothermal and heat pumps
- storm water management
- greening of the site

The project is based on **Canada Green Building Council** principals and **LEED** standards. The facility remains open to the public for daily operations throughout the construction.
