

Petro-Canada Cafeteria

Mississauga, Ontario, Canada

Description

With the completion of the new 100,000sf Office and Research Centre, Petro-Canada wanted to upgrade their existing employee's food services area in an adjacent building in the complex.

Trumbley & Hampton's renovations involved a complete makeover and enlargement of a 1960's vintage cafeteria in a small, dark area of the Research Complex. We removed and recycled the components and walls of an existing adjacent mechanical room to create a larger footprint. All existing finishes were also removed and recycled. We designed and installed high occupancy mechanical systems to provide heating, cooling and fresh air ventilation. A new ceiling system provided a warmer interior along with new hard surface flooring and wall treatments to provide an attractive yet durable finish. Fixturing included Le Marche style food displays to provide a true break from the office design décor.

End Use

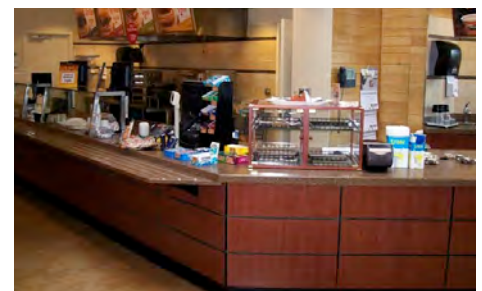

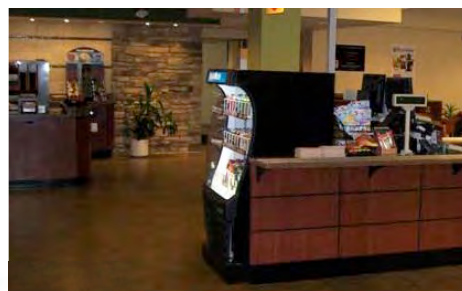

Cafeteria

Building Size

6,000 sf

Special Features

- high end finishes
- accent lighting
- all new mechanical and electrical systems
