

RAD/COMM Systems

This rapidly growing company that produces testing equipment had outgrown its leased facilities. With the guidance of Colliers International, Rad-Comm contracted with Trumbley & Hampton to design and construct a new Head Office and Assembly Plant in the prestigious Winston Business Park in Oakville, Ontario.

Rad-Comm wanted a high-tech look to stand out from the rows of brown brick buildings. This was accomplished with a striking layout of reflective glass in horizontal framing set in white architectural precast highlighted with the company's corporate blue accents.
